#### **Tutorial Hosting Website**

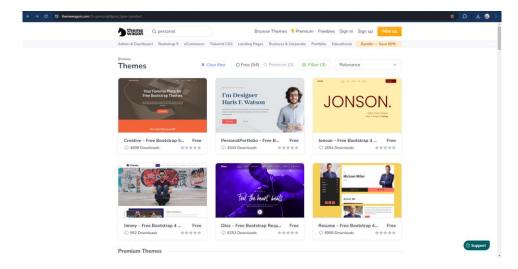

Nama : Rana Yoda Hanifah

Kelas : D3SI 47-03

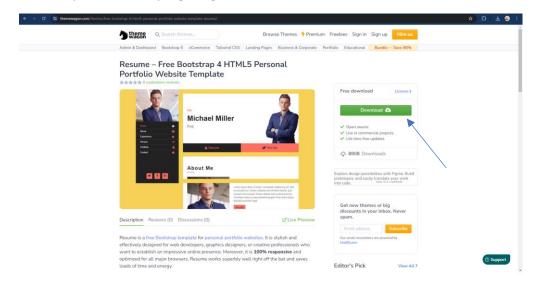

Mata Kuliah : Arsitektur dan Jaringan Komputer

Berikut adalah Langkah-langkah dalam membuat hosting web menggunakan github:

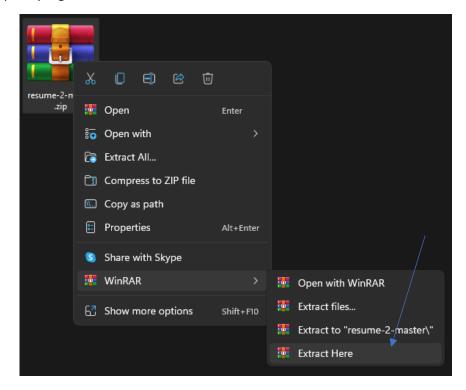

1. Akses website <a href="https://themewagon.com/">https://themewagon.com/</a> untuk mencari template website yang diinginkan

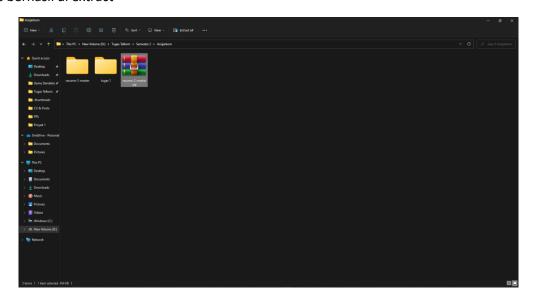

2. Download template website yang diinginkan

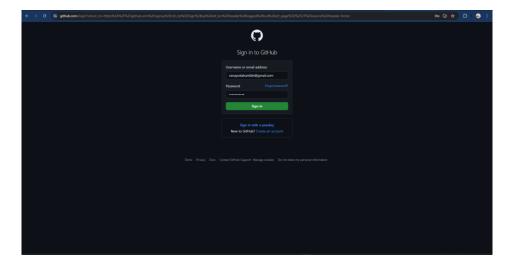

# 3. Extract zip file yang telah di download

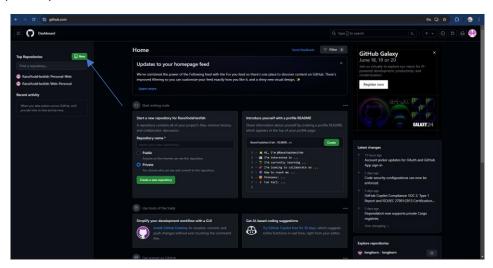

#### 4. File berhasil di extract

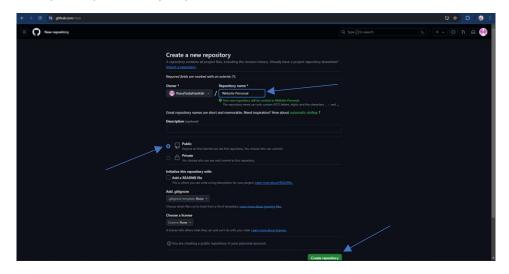

# 5. Login github

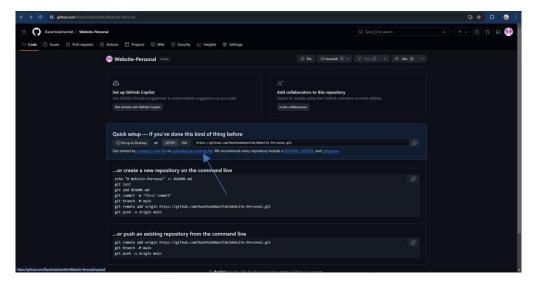

6. Buat repository baru

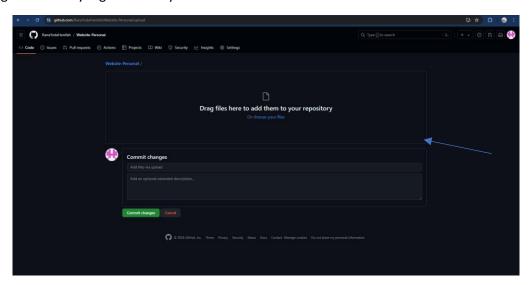

7. Buat nama repository buat menjadi publik

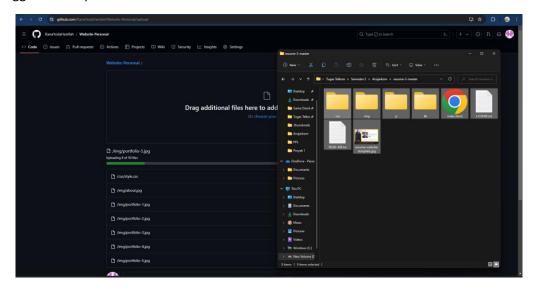

8. Upload file website yang telah di extract

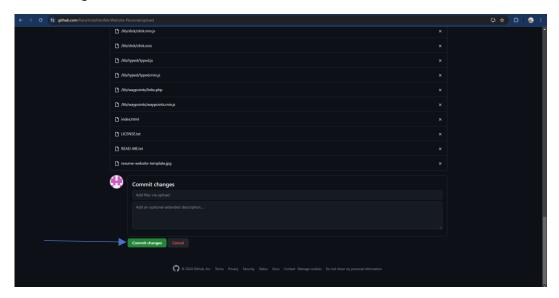

9. Drag file extract yang sebelumnya disini

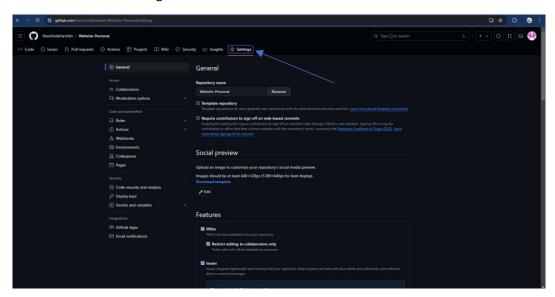

10. Tunggu file terupload

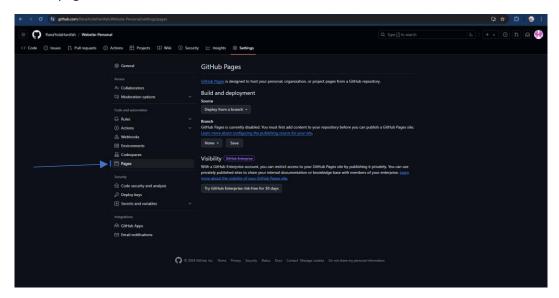

# 11. Commit changes

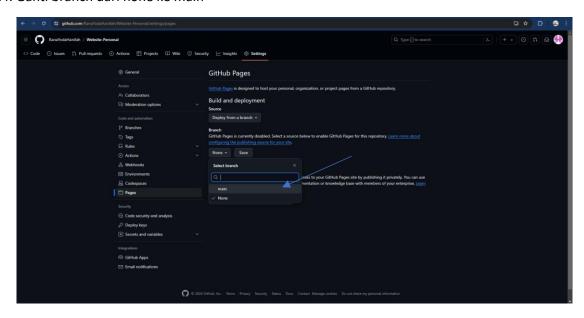

# 12. Setelah itu ke menu settings

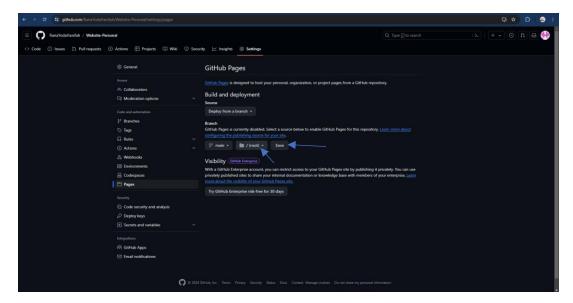

#### 13. Ke menu pages

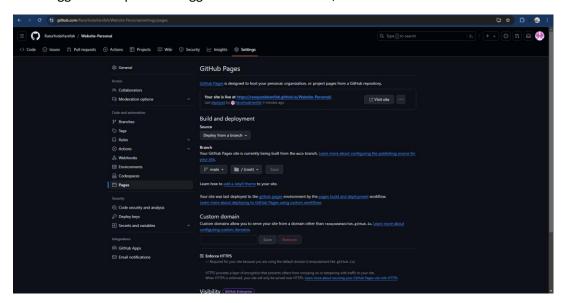

#### 14. Ganti branch dari none ke main

15. Pastikan file nya "/root" lalu save

16. Tunggu beberapa saat hingga link website muncul, klik visit site.

# 17. Website telah berhasil di hosting
